Flood relief camp info system

By this we are planning to collect things really needed to each camp from public/NGO etc.

Features

1. Role based application with two roles, which are Admin and Camp head.
2. Admin Can create new district and camps.
3. Camp head updates and publishing the camps details.

Application flow

Admin

Login → Add/Edit/Del new district.

Add/Edit/Del new camp. → Verify and activate camp

Camp admin

Login → Add/edit/delete inventory for camp.

Location details of camp → Verify and publish to public.

Public

Selecting district from the left menu or searching district name. → Showing the list of camps under selected district.

Searching for a specific camp name.
